

Years 3 Topic Work Summer Term – Year 3 Skills

Your target is to complete at least 3 projects from the grid. You must do the one in the middle.

Think back to when we learnt about the layers of the earth. Can you remember what is under the crust? Make a model to represent the layers inside the earth!

Draw a landscape sketch of a view from your window. Think about what you can see and how big things are. Don't press too hard with your pencil. If you have watercolours, you could paint your drawing.

Design a product that can hold your pens and pencils. Draw your designs and label them. If you have some material and thread you might even be able to make it! Don't forget to measure accurately.

Archaeological Dig!

With permission from an adult, choose a small area outside your house and gently dig. See what items you find. Where have they come from? What does it tell you?

Think about the town or village you live in. Imagine you were a tourist that was thinking about visiting. Create a leaflet to try and persuade people to visit. What things could they do?

Research an area of the UK using the internet and maps. Compare its human and physical features to the Lake District. Present your findings in any way you like.

Research Stone Age artefacts and design and make your very own.

Think back to one of your favourite days, it could be a day at school or a day you went out. Write a diary entry about your day. How did you feel? What was your favourite thing?

An idea of your own...
