

# Dressed for the Job

Written by  
Emma Lynch

Many different clothes

helmet

Have you ever noticed that we wear many different kinds of clothes?

face mask

Clothes can protect us and help us  
to do our jobs.

## Clothes to be noticed

Ambulance drivers wear bright clothes so we can spot them in a crowd. If they race to help at an accident, we let them through.

Cyclists wear shiny strips on their clothes.  
Car drivers see the cyclists and keep  
their distance.

## Clothes for far-out places

**Fleecy** clothes protect this explorer from the **intense cold**. He wears a whistle so he can call for help in a snowstorm.

**Gravity boots**  
help spacemen  
to walk on  
the moon.

A spaceman wears a helmet and great  
big gravity boots.

Clothes for making a scene

This cinema actor is making a film at the castle. He is dressed for a fight scene.

A circus acrobat  
needs to have  
great balance.

Circus acrobats wear fancy costumes.  
They look very graceful.

## Clothes for playing sport

Footballers wear boots with laces at the side. The laces stay out of their way when they kick the ball.

A helmet  
protects the  
player's face  
from the ball.

Cricket players protect their legs from the  
fast pace of the ball.

## Clothes for defence

This scientist wears clothes that hide her body. This is so that acid can not get on her skin.

A photograph of an operating room. In the foreground, a person wearing a blue surgical cap and a white face mask is looking down. In the background, another person wearing a blue surgical cap and a blue face mask is looking towards the camera. The background is slightly blurred, showing medical equipment and the sterile environment of an operating room.

Everyone in the  
operating room  
wears a mask.

Doctors and nurses wear gowns over  
their clothes.

## Your clothes

Do you sometimes have to wear different kinds of clothes?

Why do you need to wear these clothes?

## Glossary

acid

chemical that can burn skin

fleecy

woolly, like the coat of a sheep

gravity boots

boots that weigh a lot

intense cold

very cold
